

SWOOP

Chic, cool and graceful.

The Swoop is an exquisitely designed light formed in a spectacular arc to a slender peak. The two design variations make it perfect for both creating a minimalist space and for those who prefer more traditional design.

The Swoop Floor light is available with a hand crafted hanging wooden shade or with an inset LED light to maintain the design's minimalist aesthetic. To create a striking feature you can have two of these versatile Swoop lights positioned back to back, or at right angles as shown in the photography below.
